Tata Renewable Energy Commits ₹49,000-Cr Investment in Andhra

Company to develop 7,000 MW of green energy projects in state; investment expected to generate about 33,000 jobs and ₹3,000 crore revenue via GST

Our Bureau

New Delhi: Tata Power Renewable Energy, a unit of Tata Power, has committed to invest ₹49,000 crore to develop 7,000 MW of renewable energy projects in Andhra Pradesh.

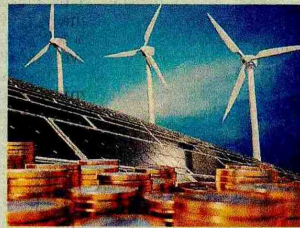

This is one of the largest investments in the renewable energy sector in the state by the company. So far, renewable energy projects have largely been planned in Anantapur and Kurnool districts. Tata Power Renewable Energy will go beyond the two districts and develop projects in Cuddapah and Prakasam as well.

The 7,000 MW projects comprise 4,200 MW solar energy and 2,800 MW wind energy. Out of these, the maximum installed capacity is being planned for Anantapur is 2,200 MW. The company is planning 1,800 MW projects each in Kurnool and Cuddapah and 1,200 MW in Prakasam.

This investment is expected to generate about 33,000 jobs and ₹3,000 crore of revenue through state goods and services tax for Andhra Pradesh.

Andhra Pradesh information technology and electronics minister Nara Lokesh has been spearheading the state's efforts to attract investments. He had visited the Tata Group headquarters in

Power Pact

TPREL's investment commitment marks the return of Andhra Pradesh as a renewable energy hub

Mumbai last year and met chairman N Chandrasekharan. After this visit, Tata Consultancy Services had announced setting up of an IT facility with up to 10,000 employees in Visakhapatnam.

This is the second big-ticket investment of the group in the state. A memorandum of understanding has been signed between Tata Power Renewable and the New and Renewable Energy Development Corporation of Andhra Pradesh, the state's nodal agency for implementation of renewable energy projects.

Till about five years back, Andhra Pradesh was among the frontrunners in the renewable energy sector in terms of installed capacity. It has now slipped to the seventh spot with an installed capacity of 9,500 MW. The sector was identified as one of the key areas by chief minister N Chandrababu Naidu after he assumed power in June 2024. Working on this, the state government came out with an Integrated Clean Energy Policy in October 2024 and announced a target of 160 GW and ₹10 lakh crore of investment. Since then, the government has been working towards attracting investments in the sector.

Serentica Renewables has announced establishing renewable energy projects with a combined capacity of 10 GW in the state.

Tata Power arm set to invest ₹49K cr in RE projects in Andhra

SHINE JACOB
Chennai, 7 March

Tata Power Renewable Energy (TPREL), a subsidiary of Tata Power, has signed a deal with Andhra Pradesh to explore opportunities to develop up to 7 gigawatts (Gw) of renewable energy — including solar, wind, and hybrid projects with or without storage solutions. It is likely to attract investments worth ₹49,000 crore, making it one of the largest renewable energy investments in the state.

The company signed a memorandum of understanding (MoU) with the government of Andhra Pradesh on Friday in Amaravati, marking a significant step towards advancing the state's renewable energy ambitions.

This partnership aligns with the state's vision to enhance its renewable energy portfolio and accelerate the transition towards a sustainable and green energy future.

Additionally, beyond contributing to Andhra Pradesh's clean energy targets, this MoU will provide a boost to the local economy, foster skill development, and support livelihoods, ultimately contributing to the socio-economic growth of the state.

The proposed projects would be developed under Andhra Pradesh's Integrated Clean Energy (ICE) Policy, a landmark clean energy framework that aims for the state to develop over 160 Gw of renewable energy, with an investment potential of ₹10 trillion.

Deepesh Nanda, chief executive

■ Tata Power Renewable Energy Ltd and the Andhra Pradesh government have signed an agreement to develop up to 7 Gw of renewable energy projects

■ Clean energy policy to generate investments worth ₹10 trn and 7.5 lakh jobs for the state

officer and managing director, TPREL, said: "We are delighted to partner with the government of Andhra Pradesh in advancing the state's clean energy journey. By leveraging our expertise and cutting-edge technology, this partnership will drive large-scale renewable adoption and contribute to India's sustainability goals. Developing up to 7 Gw of clean energy projects will further strengthen Andhra Pradesh's position as a renewable energy hub."

Nara Lokesh, minister of information technology, said: "We are pleased to welcome Tata Power Renewable Energy Limited in advancing Andhra Pradesh's renewable energy landscape. This collaboration marks a deepening of the long-standing relationship between the state and the Tata group. We expect our landmark clean energy policy to generate investments of ₹10 trillion and 7.5 lakh jobs for the people of Andhra Pradesh."

Tata Power arm, Andhra govt tie up for 7,000 MW projects

FE BUREAU
Mumbai, March 7

TATA POWER RENEWABLE Energy (TPREL), a subsidiary of Tata Power, on Friday said it has signed a memorandum of understanding (MoU) with the Andhra Pradesh government to collaborate and explore opportunities in the renewable energy projects in the state.

Under this strategic agreement, TPREL and the Andhra Pradesh government will jointly explore renewable energy (RE) development opportunities of up to 7,000 MW (7 GW), including solar, wind, and hybrid projects with or without storage solutions.

The estimated investment in these projects stands at nearly ₹49,000 crore, making it one of the largest renewable energy investments in the state.

This partnership aligns with the state's vision to enhance its renewable energy portfolio and accelerate the transition towards a sustainable and green energy future, the company said.

Additionally, beyond contributing to Andhra Pradesh's clean energy targets, this MoU will provide a boost to

the local economy, foster skill development and support livelihoods, ultimately contributing to the socio-economic growth of the state, it said.

The proposed capacities would be set up under Andhra Pradesh's Integrated Clean Energy (ICE) policy, a clean energy framework that aims for the state to develop over 160 GW of renewable energy with an investment potential of ₹10 lakh crore.

Deepesh Nanda, CEO & managing director, TPREL, said, "By leveraging our expertise and cutting-edge technology, this partnership will drive large-scale renewable adoption, and contribute

to India's sustainability goals.

"Developing up to 7 GW of clean energy projects will further strengthen Andhra Pradesh's position as a renewable energy hub and accelerate its transition towards a low-carbon economy."

As part of the agreement, TPREL will conduct preliminary assessments, feasibility studies, and development activities to explore the viability of these projects.

The New and Renewable Energy Development Corporation of Andhra Pradesh (NREDCAP) would be providing requisite support in terms of facilitation, site identification and support in evacuation infrastructure.

- TPREL and the AP government will jointly explore RE development opportunities of up to 7,000 MW
- Investment in these projects stands at nearly ₹49K cr, among largest RE investments in the state
- The MoU will provide a boost to the local economy, foster skill development and support livelihoods

The Hindu Business Line	New Delhi, Mumbai, Bangalore, Chennai, Kolkata, Hyderabad, Kochi, Pune	Tata Power unit exploring \$5.6 billion clean energy investment in AP

Tata Power unit exploring \$5.6 billion clean energy investment in AP

Reuters

Tata Power Renewable Energy Ltd (TPREL) said on Friday it is exploring setting up 7 gigawatts (GW) of green energy projects in Andhra Pradesh at an investment of ₹49,000 crore (\$5.63 billion).

TPREL, a unit of Tata Power, is looking into clean energy projects, including solar, wind and hybrid, with or without storage solutions, making it one of the largest renewable energy investments in Andhra Pradesh, the company said.

Tata Power has plans to invest up to \$9 billion to scale

up its renewable energy capacity over the next five years.

GOVT TARGET

India has committed to setting up 500 GW of non-fossil fuel electricity generation capacity by 2030.

Separately, States are aiming to develop their own clean energy portfolio as they find buying power from central projects expensive and also due to the lack of inter-State transmission infrastructure. Andhra Pradesh aims to develop more than 160 GW of renewable energy, with a potential investment of ₹10 lakh crore.

Tata Power Renewables signs MOU worth \$5.6 Bn with Andhra Pradesh govt

Saturday 8th March, 2025

Tata Power Renewable Energy Ltd (TPREL), a unit of Tata Power Co, signed an initial agreement to develop renewable projects worth as much as Rs 49000 crore (\$5.6 billion) in Andhra Pradesh, making it one of the largest renewable energy investments in the state, the company said in an exchange filing. TPREL has signed a Memorandum of Understanding (MoU) with the Government of Andhra Pradesh to collaborate and explore opportunities to build up to 7,000 MW including solar, wind and hybrid projects with or without storage solutions. This partnership aligns with the State's vision to enhance its renewable energy portfolio and accelerate the transition towards a sustainable and green energy future, the company said, adding that the proposed capacities would be set up under Andhra Pradesh's Integrated Clean Energy (ICE) Policy, a landmark clean energy framework that aims for State to develop over 150 GW of renewable energy with an investment potential of Rs 10 lakh crore. Tata Power's scrip ended at Rs 351.30, down 0.76% on the BSE Friday.

Business Standard	Tata Power arm signs MoU with Andhra Pradesh Govt to develop RE projects

Tata Power arm signs MoU with Andhra Pradesh Govt to develop RE projects

This partnership aligns with the state's vision to enhance its renewable energy portfolio and accelerate the transition towards a sustainable and green energy future.

Additionally, beyond contributing to Andhra Pradesh's clean energy targets, this MoU will provide a boost to the local economy, foster skill development, and support livelihoods, ultimately contributing to the socio-economic growth of the state.

The proposed projects would be developed under Andhra Pradesh's Integrated Clean Energy (ICE) Policy, a landmark clean energy framework that aims for the state to develop over 160 GW of renewable energy, with an investment potential of ₹10 trillion.

Deepesh Nanda, chief executive officer and managing director, TPREL, said, "We are delighted to partner with the government of Andhra Pradesh in advancing the state's clean energy journey. By leveraging our expertise and cutting-edge technology, this partnership will drive large-scale renewable adoption and contribute to India's sustainability goals. Developing up to 7 GW of clean energy projects will further strengthen Andhra Pradesh's position as a renewable energy hub and accelerate its transition towards a low-carbon economy."

Nara Lokesh, minister of information technology, said, "We are pleased to welcome Tata Power Renewable Energy Limited in advancing Andhra Pradesh's renewable energy landscape. This collaboration marks a deepening of the long-standing relationship between the state and the Tata group. By fostering investments and innovation, we aim to accelerate clean energy deployment while ensuring long-term economic and environmental benefits for the state. We expect our landmark clean energy policy to generate investments of ₹10 trillion and 7.5 lakh jobs for the people of Andhra Pradesh."

As part of the agreement, TPREL will conduct preliminary assessments, feasibility studies, and development activities to explore the viability of these projects. The New and Renewable Energy Development Corporation of Andhra Pradesh will provide requisite support in terms of facilitation, site identification, and assistance in evacuation infrastructure.

This initiative is expected to significantly enhance Andhra Pradesh's renewable energy capacity while reinforcing TPREL's commitment to supporting India's clean energy mission, the company said.

Tata Power arm, Andhra govt tie up for 7,000 MW projects

Friday 7th March, 2025

As part of the agreement, TPREL will conduct preliminary assessments, feasibility studies, and development activities to explore the viability of these projects.

Renewable Energy (TPREL), a subsidiary of Tata Power, on Friday said it has signed a memorandum of understanding (MoU) with the Andhra Pradesh government to collaborate and explore opportunities in the renewable energy projects in the state.

Under this strategic agreement, TPREL and the Andhra Pradesh government will jointly explore renewable energy (RE) development opportunities of up to 7,000 MW (7 GW), including solar, wind, and hybrid projects with or without storage solutions.

The estimated investment in these projects stands at nearly Rs 49,000 crore, making it one of the largest renewable energy investments in the state.

This partnership aligns with the state's vision to enhance its renewable energy portfolio and accelerate the transition towards a sustainable and green energy future, the company said.

Additionally, beyond contributing to Andhra Pradesh's clean energy targets, this MoU will provide a boost to the local economy, foster skill development and support livelihoods, ultimately contributing to the socio-economic growth of the state, it said.

The proposed capacities would be set up under Andhra Pradesh's Integrated Clean Energy (ICE) policy, a clean energy framework that aims for the state to develop over 160 GW of renewable energy with an investment potential of 10 lakh crore.

Deepesh Nanda, CEO & managing director, TPREL, said, "By leveraging our expertise and cutting-edge technology, this partnership will drive large-scale renewable adoption, and contribute to India's sustainability.

Tata Power Company recently informed exchanges that its subsidiary, Tata Power Renewable Energy Limited, has signed an MoU with the Government of Andhra Pradesh to develop renewable energy projects across the state. The Memorandum of Understanding was signed in Amaravati, marking a major step in advancing Andhra Pradesh's clean energy goals.

Under this agreement, TPREL and the state government will explore renewable energy opportunities of up to 7,000 MW (7 GW), including solar, wind, and hybrid projects with or without storage solutions. The estimated investment for these projects is around ₹49,000 crore, making it one of the largest renewable energy investments in the state. This initiative aligns with Andhra Pradesh's vision to strengthen its green energy portfolio and contribute to India's clean energy mission.

This agreement is expected to accelerate the state's transition to sustainable power while boosting the local economy. It will create employment opportunities, promote skill development, and support livelihoods, furthering socio-economic growth in the region. These projects will be developed under Andhra Pradesh's Integrated Clean Energy (ICE) Policy, which aims to achieve over 160 GW of renewable energy capacity with a total investment potential of ₹10 lakh crore.

As part of the agreement, TPREL will conduct feasibility studies and preliminary assessments to evaluate project viability. The New and Renewable Energy Development Corporation of Andhra Pradesh (NREDCAP) will play a key role in facilitating site identification and supporting the development of evacuation infrastructure.

Tata Power Renewable Energy Limited and the Andhra Pradesh Government have signed a Memorandum of Understanding (MoU) to collaborate and explore opportunities for developing renewable energy projects in the State. The agreement was signed in Amaravati, Andhra Pradesh.

The total investment for these projects is expected to be around ₹49,000 crores, making it one of the largest investments in renewable energy in the State. This partnership supports Andhra Pradesh's plan to grow its renewable energy resources and move towards a cleaner, greener future.

Through this agreement, Tata Power Renewable Energy and the Andhra Pradesh Government will look for ways to develop up to 7,000 megawatts (MW) of renewable energy. This includes solar, wind, and mixed energy projects, which may also have storage solutions.

In addition to helping the State reach its clean energy goals, this agreement will also help the local economy, create job training programs, and support people's livelihoods, thus boosting the overall development of the State.

The planned energy projects will follow Andhra Pradesh's Integrated Clean Energy (ICE) Policy, which aims for the State to create over 160 GW of renewable energy with an investment of ₹10 lakh crore.

Speaking on the occasion, **Deepesh Nanda, CEO & Managing Director of Tata Power Renewable Energy Limited**, said, "We are delighted to partner with the Government of Andhra Pradesh in advancing the State's clean energy journey. By leveraging our expertise and cutting-edge technology, this partnership will drive large-scale renewable adoption, and contribute to India's sustainability goals. Developing upto 7 GW of clean energy projects will further strengthen Andhra Pradesh's position as a renewable energy hub and accelerate its transition
